

Vladan Petrović

Senior Software Engineer

vladanpetrovic89@gmail.com | vladan.dev | linkedin.com/in/vladanpet | github.com/vladanp | Belgrade, Serbia

PROFESSIONAL SUMMARY

Senior Software Engineer with 11+ years of experience building and scaling production software across automotive, SaaS, ecommerce, scheduling, and healthcare industries.

Strong frontend expertise is paired with full stack capability across modern web applications, backend services, cloud infrastructure, CI/CD, and platform engineering. Experienced in customer facing products, internal applications, monorepos, developer tooling, experimentation platforms, and business critical workflows used at scale.

Experienced with AI assisted software engineering and agentic development, integrating AI coding tools and agents into everyday engineering for codebase exploration, solution design, implementation, refactoring, testing, debugging, code review, and developer productivity.

TECHNICAL SKILLS

Languages and Web: TypeScript, JavaScript, Java, HTML, CSS

Frontend: React, Next.js, Remix, Angular, Tailwind CSS, Design Systems, WebRTC

Backend, Cloud and Infrastructure: Node.js, REST APIs, Redis, AWS, AWS Lambda, DynamoDB, Amazon S3, Terraform, Infrastructure as Code, Docker, Kubernetes

Architecture and Developer Experience: Software Architecture, System Design, Monorepos, Developer Experience, Developer Tooling, Scalability, Performance Optimization

Delivery, Testing and Tooling: Git, GitHub Actions, GitLab CI, CI/CD, Trunk Based Development, Vite, Webpack, Nx, Storybook, Oxc, Playwright, Jest, React Testing Library, Test Driven Development, Accessibility

AI Assisted Engineering: Claude Code, Cursor, Devin, AI Agents, Agentic Development

Product Engineering: A/B Testing, Experimentation, Analytics, Tracking, Consent Management, SaaS

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Rivian | Belgrade, Serbia | Jan 2026 to Present

- Shipped the complete vehicle return journey from vehicle intake through sale for trade ins, lease returns, and buybacks. Own ongoing delivery across customer facing applications, internal tools, backend services, automated testing, CI/CD, Terraform, AWS resources, and deployment.
- Serve as one of the core maintainers of an internal frontend monorepo containing multiple employee applications. Develop features for the primary internal web application while improving shared architecture, libraries, tooling, dependencies, build processes, workflows, and engineering standards.
- Improve developer experience through stack modernization, tooling and CI improvements, dependency management, automation, and platform engineering.
- Use Claude Code, Cursor, Devin, and AI agents for codebase exploration, solution design, implementation, refactoring, testing, debugging, and code review while retaining ownership of technical decisions and production quality.

Tech Lead

TX Services / Doodle AG | Belgrade, Serbia | Dec 2018 to Jan 2026

- Led software engineering efforts within a cross functional Product Growth team, contributing during the company's growth from approximately CHF 1 million to CHF 10 million in annual recurring revenue.
- Designed and delivered more than 100 A/B tests and product experiments, owning the lifecycle from ideation and technical planning through implementation, data collection, analysis, and deployment to a platform serving more than 30 million users.
- Led the migration of every frontend team to a shared monorepo, improving development and maintenance efficiency, deployment speed, and quality control. Drove adoption of TypeScript and Next.js through hands on implementation, technical consultation, internal technical talks, and collaboration across teams.
- Built and maintained SaaS products used by millions of users, including billing and payment integrations, timezone handling, analytics and tracking, experimentation infrastructure, and premium subscriptions that supported the company's move toward a SaaS model.
- Solved platform wide engineering problems and responded to production incidents, improving reliability, maintainability, performance, and developer experience.
- Partnered with product, engineering, data, and leadership teams on company wide initiatives, analytics, consent management, technical interviews, mentoring, and knowledge sharing.

Frontend Developer

Commerce Connector GmbH | Stuttgart, Germany | Jul 2017 to Dec 2018

- Built and maintained SaaS ecommerce applications, including B2C widgets and an enterprise administration platform.
- Implemented custom widget solutions that contributed to securing contracts worth approximately EUR 2 million with major international brands.
- Developed and maintained the reusable JavaScript platform used to integrate and customize widgets across different websites, applications, and technology stacks.
- Delivered reporting systems, AWS integrations, backend services, and internal administration applications while contributing to DevOps practices that improved delivery and collaboration.

Software Developer

Comtrade Group | Kragujevac, Serbia | Nov 2014 to Jul 2017

- Developed a healthcare platform used by cardiologists to monitor patient data, generate reports, and identify cardiac risks for European Union and United States markets. The platform was approved through independent third party audits.
- Built, published, and maintained two mobile applications used by hospital staff for secure real time communication with patients and documentation of patient needs.
- Applied Test Driven Development, automated testing, and engineering documentation to meet regulatory requirements for healthcare software across multiple markets.
- Collaborated with the QA team to establish automated testing infrastructure, including parallel cross browser testing, improving test coverage and engineering efficiency.
- Developed proof of concept applications and technical demonstrations for enterprise customers, including an electrical device monitoring platform.

EDUCATION

Bachelor of Applied Science (B.A.Sc.) in Informatics

Technical College of Vocational Studies | 2016
